

#1 Solution  
Connect IT  
to Business

# Correlata

For Driving The Federal Data Center  
Consolidation Initiatives (FDCCI)  
Without Surprises

Following “The Office of Management and Budget (OMB) that launched the Federal Data Center’s Consolidation Initiatives (FDCCI) to promote the use of Green IT Federal agencies across Civilian, Subsequently allowing them to:

- Maximize IT operation efficiency,
- Mitigate risks in advance,
- Reduce operations costs.

**Enables Government & Federal Data Centers to meet (DCOI) Data Center’s Optimization Initiatives Mandates by 2018 deadline.**

## The Main goals of DCOI

- Data-Center Consolidation
- Data-Center Optimization
- Cost Saving
- Better Efficiency
- Mitigate Risk in Advanced
- DCOI Mandates by 2018 deadline

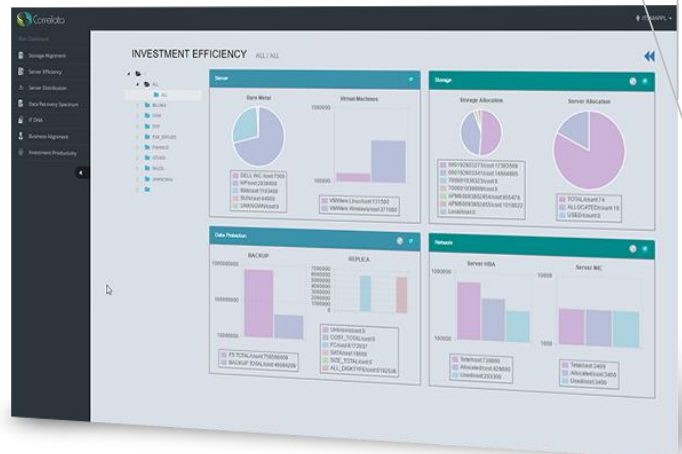

# Drive Your Data Center Without Surprises

Prior to any Consolidation, implementing Use-what-you-consume strategy, it is essential for organizations to identify the true usage of IT services. There is a need to consolidate all IT related resources provisioned to each one of the cost centers in order to measure and quantify the allocated and used resources.

We Navigate the Complex World Of Data Center Management

Correlata is changing the Data Center management domain with Vendor-Agnostic analytics solution (Patent) that provides management and IT leaders to quantify for the first time the true value and contribution coming directly from IT to the business layer and helping to make Cloud migration accurate fast and swift without surprises .

# Correlata Enables Government / Federal Data Centers to meet DCOI mandates by 2018 deadline, and empowers Government / Federal Data Centers to DCOI Compliance in 3 main areas:

## (1) Data Center Consolidation and Optimization

Correlata CorreAssess™ will identify the IT infrastructure elements and services allocated to each LOB, Application and environment, identify orphan, leftovers and miss-configurations exposing allocated but not in use IT resources and combine it with customer's own costs to reflect the real IT infrastructure burdening, so the IT requirements to new cloud services will encompass the real need rather than preserve inefficiency using an excellent momentum of change.

## (2) Data Center Operation Efficacy

Correlata inspect for the first time the relations between the datacenter systems layer and the business layer and provides unique insights into the daily wellbeing of IT business operations, making sure that you're not just up and running, but highly available, resilient per your design intentions and business objectives, regulations and compliance.

## (3) Cost Saving & Immediate ROI

Correlata automatically identifies the chain of infrastructure elements and services allocated to applications and identifies gaps between real resource provisioning and allocation vs. claim and usage of IT infrastructure elements

## Correlata Unique Deliverables

**Charge Back** – Provide Cost transparency with an ability to have accurate charge for different P&L accounts Or Units, based on Empirical tool,( unlike existing methods Base on Employees number or licenses number)

**Easy Cloud Migration & True Sizing** - It's a world full of surprises and unplanned costs. Correlata visualize you the overall size you need or a sub group size for your business layers ,based on empirical tool.

**Predict the Risk In Advance** - Full correlation between policies, governance, risk and compliance. Identify wrong configurations and human errors before they become system and business wide failures.

**Operational Excellence & Efficiency** - Break the silo effect, make the complex simple, and provide transparency and visibility across all systems, platforms and applications. All in one dashboard and one common language.

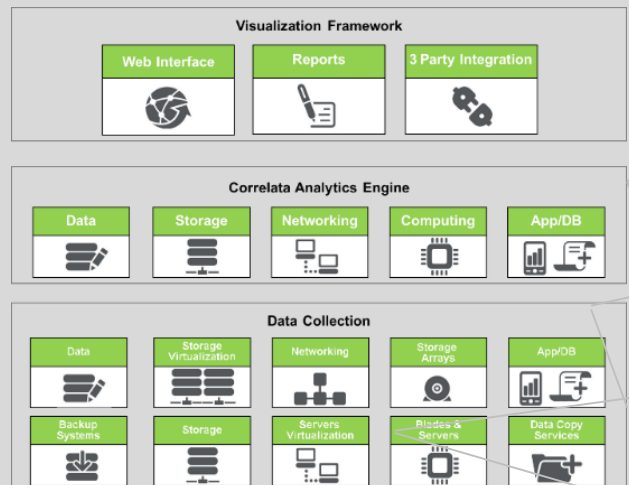

**Direct and Indirect Savings** - Reclaim and save stranded IT resources. Reduce operational

**Supporting Greenlight Business Objectives** - The logic is simple – by reducing power consumption and preventing unnecessary IT sprawl, IT departments can reduce environmental impact and encourage other business units to function sustainably and effectively.

## Correlata Technology

We are using advanced technologies in machine learning, intelligence analytics, and automation processing to empower the next generation of Data Center management and operations experience and for the first time companies can manage all their business IT needs in one place – Simple, Efficient and 100% Cost effective!
